If you enjoyed Wanderlust: Rebirth, then Wanderlust: Adventure is a must have. Would recommend to anyone looking for a great co-op experience also.. Fun game even when only played locally with friends. The developing team has done everything right with this game and we cant blame them for the lack of online players. The price is amazing for what it gives even without the online feature anyways as i said. Definetely reccomended.. The holocaust wasnt even as bad as this game was. It's not a bad game, it's just a bad PC game. If it were a two dollar mobile game, you might be able to overlook the annoying sound effects, crummy visuals, terrible UI and complete lack of tutorial. Did I mention boring enemies? Or weak selection of boring weapons?

Because those things also.. pretty good game

Tons of lore, side stories and spells. *Girlish Grimoire Littlewitch Romanesque* is a game about making two lolis masters of magical arts within 3 years. While you won't have much freedom turning them to the kind of mage you desire, the character interactions will make up for it, big time.. I like it!

The controls are simple, the graphics might appear as generic 8-bit stuff at first, but you'll soon experience multiple effects which make the game stand out from the hundreds of 8-bit platformers on Steam. The engine runs flawlessly and gameplay is rather exciting as there are many different enemy types and every level is in a different setting.

The movie was horrible. So it's a good thing that at least the game adaption is decent.. Haven't found anything original. It's just a generic survival game. Just different setting. The game contains most generic design mistakes all other small time devs make when trying to do their own version of *Rust* (like a shabby slotted inventory system). It's evident that game engine development is a priority right now. No serious gameplay features that will define this game are implemented yet. More to say no serious gameplay feature are even announced yet. Like what goal there is to play?

Most survival games tend to stay in this stage forever. Engine demo without any idea behind a gameplay. Bunch of useless mechanics and assets piled together with no reason behind it.

There is nothing to enjoy in this game right now besides a few hours of learning basic mechanics. Then there is nothing. No progression. No achievements. No goals.. I'm not going to give a super long review on this game, as the reviews here are already pretty detailed. But this game shouldn't be glossed over, it's a fantastically addictive shmup! It has just enough ship variety, just enough challenge thanks to the adaptive difficulty system in place, and even the story is enjoyable, albeit simple.

If you're a fan of shmups or even new to the genre, this is a pretty great game that you should check out. Highly recommended.. Nice gem of a game. Can tell it is still early access quality but so far I have found it to be quite addictive. Not too hard, not too easy. As others have said the soundtrack is pretty good too.

Heading towards GDC:

Greeting, fellow ECHOs!

We wanted to share some good news with this growing community: we'll be assisting this year's Game Developers Conference and Game Connection at San Francisco next week!

Here at Bacus Studios, we have a grand vision for our small indie studio and our first commercial title, *Trident's Wake*. We've been working tirelessly towards this goal, and now we're just a few steps for achieving this. In its current state, all of the game's base mechanics have been implemented and tested we're currently in the process of polishing the build we'll be showcasing during the events.

What we're missing now is content. We have created tools and processes that allow us to streamline the content creation for our game, and now we need to start producing that content. Our base goal for this game is to have at least 20 hours worth of original content for a standard player, and around 25 for a "completionist". We'd also like to localize the game into at least 6 languages, support other operating systems, and port the game for consoles (our couch co-op feature is a great plus there). From the very beginning, we have produced every asset with those considerations in mind, but we can currently only focus our budget on one system, and that's Windows.

We've been fortunate enough to be able to showcase our game, in different stages of development, at several local and national events. The feedback we have received has been overwhelmingly positive.

Our mission during the events at San Francisco is to share this experience with a much broader and tougher audience, as well as demonstrating what we're capable of to several publishers, in order to secure the funds to be able to deliver the game we have envisioned.

If, however, we are not able to do so, do not be disheartened. We will still release the game, only that it will be as an Early Access title. We know a lot of gamers are already burnt out on Early Access titles, and as gamers ourselves we've had those experiences as well. However, there are some very good positives of Early Access, especially since we'd be releasing a stable, playable version of the game, in which your feedback will be priceless.

As for now, if any of you are going to be present at the events, we invite you to come try out our game during the Dutch

Courage party, sign up on [Eventbrite](http://www.eventbrite.nl)[www.eventbrite.nl].

We'll update you as soon as we have any news on this regard.

. **Up to 80% off in the Lunar New Year Sales!:**

Hello Playism Fans

Happy Lunar New Year! The Steam sales have kicked off and there are celebrations all around.

We have set a whole bunch of amazing Playism games on sale, with up to 80% off!

Check out the full list on [our Publisher Page](#) or [on the Playism blog](http://blog.playism-games.com)[blog.playism-games.com].

On top of having up to 80% off, we also have some exciting news!

Touhou Luna Nights - Announcing the next update and end of Early Access. **Q&A with Irony Curtain Team!:**

Comrades,

Usually, dictators benevolent Fathers of a Nation don't tend to answer questions – they ask them!

But today the tables turn – go ahead and **?ask anything?**: the Irony Curtain dev Team will answer all your conundrums in an Irony Q&A!

Ask away in the comments below and at the beginning of February we'll answer them all in a Q&A video. 🗣️

Meanwhile, don't forget to [add Irony Curtain to your wishlist!](#)
